Photographic Science and Engineering

Volume 17, Numbers 1–6

January/February **(1)**	1–132
March/April **(2)**	133–252
May/June **(3)**	253–364
July/August **(4)**	365–420
September/October **(5)**	421–488
November/December **(6)**	489–536

TITLE INDEX

Anomalous absorption and luminescence spectra of 1,1-methylene-2,2-cyanine dye
Walter Cooper. 3

Attachments and spectral shifts of dye aggregates to silver bromide surfaces
Charles Reich, William D. Pandolfe, and **George R. Bird.** 334

Behavior of space charge in photoemulsion crystals subjected to impulsed electric fields
D. M. Samoylovitch and **J. V. Ardashev.** 351

Characterization of xerographic thermoplastic holographic recording material
Richard F. Bergen. 473

Chemical sensitization of silver bromide
P. Junod, E. Schumacher, R. Steiger, and **J. Wullschleger.** 205

Decomposition of microcrystalline metal halides by irradiation with ruby laser
Eiichi Inoue, Hiroshi Kokado, Isamu Shimizu, and **Shuichi Ootsuka.** 405

Dependence of radiographic imaging on the input x-ray spectrum and screen-film optics
A. G. Haus, K. Rossmann, and **C. E. Metz.** 503

Design of an information retrieval system for photographic chemistry technology, processes, materials
Robert W. Graham and **Harry E. Roberts.** 278

Direction of photocurrents in silver chloride with adsorbed spectrally sensitizing and desensitizing dyes
B. Levy, M. Lindsey, and **C. R. Dickson.** 115

Dye-sensitized photolysis of diazonium compounds—I
Toshihiro Yamase, Tsuneo Ikawa, Hiroshi Kokado, and **Eiichi Inoue.** 28

—Part II
Toshihiro Yamase, Tsuneo Ikawa, Hiroshi Kokado, and **Eiichi Inoue.** 268

Effects of moisture on photographic sensitivity
T. A. Babcock, B. P. Michrine, P. A. McCue, and **T. H. James.** 373

Electron lattice interaction in the silver halides
John S. Wei and **Frederick C. Brown.** 197

Electron spin resonance as applied to development kinetics
J. Charkoudian, A. Ames, and **A. Hoffman.** 456

Electronic absorption, luminescence, and related properties of resolved J-aggregates of 1,1-diethyl-2,2′-cyanine adsorbed to silver halide
W. Cooper. 217

Energy levels for nondevelopable silver centers formed by *t*-butylamine borane on silver halide surfaces
D. J. Locker. 442

Evaluation of exposure parameters for photoresist materials
M. R. Goldrick and **L. Rankel Plauger.** 386

Experimental studies on the localized and nonlocalized electronic states in silver halides at low temperature
H. Kanzaki and **S. Sakuragi.** 69

Grain size determination by electrolytic reduction
A. B. Holland and **J. R. Sawers.** 295

Gray level enhancement techniques for increasing the observability of the borders of features of digitized imagery
Walter H. Delashmit and **Robert F. Webber.** 518

How many quanta, revisited
Allan E. Ames. 154

Hückel molecular orbital descriptions of cyanine dyes: contours, methods, and results
D. M. Sturmer and **W. S. Gaugh.** 146

Impurity ions and vacancies in silver halide crystals
A. P. Batra and **L. M. Slifkin.** 64

Influence of fog grains on detective quantum efficiency
R. Shaw. 495

Initial chemical development reaction
W. E. Mueller. 94

Intensity dependent photoimaging systems
A. Zweig, W. A. Henderson, Jr., and **K. R. Huffman.** 451
Investigations on the influence of (Br^-) and (NH_3) on the shape of AgBr crystals in gelatin solutions
W. Markocki and **A. Zaleski.** 289
Ionic conductivity of emulsion spectra
J. P. Smirnov and **P. V. Meiklyar.** 285
Isoluminous additive color method for the detection of small spectral reflectivity differences
Edward Yost, Robert Anderson, and **Alexander F. H. Goetz.** 177
Kinetics of silver formation in single emulsion grains II. The effect of cell potential on the growth rate of development centers
R. B. Pontius and **R. G. Willis.** 21
—III. A comparison of the early stages of development by ascorbic acid, by 2-chloro-4-aminophenol, and by a combination of the two agents
R. B. Pontius and **R. G. Willis.** 157
—A summary
R. B. Pontius and **R. G. Willis.** 326
Kinetic study of the conversion of silver bromide sol to iodide
S. Nishiyama and **W. F. Berg.** 299
Latent-image fading of three commercially available fine-grained emulsions
R. A. Armistead and **F. B. Galimba.** 42
Lead halides: Photolysis and image recording
W. C. deGruitjer and **J. Schoonman.** 382
Luminescence spectra of photographic coatings
A. A. Sadykova and **P. V. Meiklyar.** 315
Macroscopic theoretical representation of the gamma for a xerographic system
Edwin R. Hill and **Jerome J. Griesmer.** 47
Modified electron transfer mechanism for spectral sensitization. VII. Spectral sensitization of photoelectric effects in various photoconductors
Tadaaki Tani. 11
Molecular orbital calculation of electronic properties of metal nuclei
Roger C. Baetzold. 78
Molecular weight analysis of the condensation product of 4-diazo-diphenylamine bisulfate and formaldehyde
Ken-ichi Shimazu. 33
Noiseless amplifiers and the ultimate capabilities of organic imaging systems
George R. Bird. 261
Numerical solution for the pressure and film thickness around the nip
S. S. Hwang. 38
Observations on the role of polyethylene-oxide in the acceleration of development
Yutaka Inaba and **Akira Kumai.** 499
On the need to apply electromagnetic theory to optical behavior of photographic emulsions
C. R. Berry. 394
Optical constants of filamentary silver grains
S. K. Salib and **J. J. de Palma.** 165
Partial restoration of images from aerial photographs using experimentally derived Fourier filters
William H. Carter. 50
Participation of addenda in the photographic process
J. Malinowski. 86
Photographic effects of metal ions I: Effects of divalent metal ions upon emission and photographic processes in silver bromide and silver iodobromide grains
Tadaaki Tani. 434
Photographic properties of anodically formed silver halide layers
Arnold Hoffman, David P. Kennedy, Maurice Wright, and **B. Billings.** 272
Photographic sensitizing and desensitizing phenomena of various silver halide grains by electron traps
Tadaaki Tani. 306
Photographic speeds based on radiant energy units
J. H. Altman, Jr., F. Grum, and **C. N. Nelson.** 513
Photoimaging using a light-sensitive polymer
F. A. Stuber, H. Ulrich, D. V. Rao, and **A. A. R. Sayigh.** 446
Photon noise amplification due to photographic defects
R. Shaw. 491
Photovoltaic effects in photographic coatings
V. G. Vlasov and **P. V. Meiklyar.** 343
Physics and chemistry of silver halide surfaces—space charge effects
Harry A. Hoyen, Jr. 188
The color gamut obtainable by the combination of subtractive color dyes. II. Actual dyes in color film. (2) Optimum spectral characteristics of absorption bands
Noboru Ohta. 183
Positron annihilation in silver halide
T. M. Kelly. 201
Reaction of mucochloric acid with amino acids and gelatin
F. Moll and **R. Fischer.** 469
Red luminescence of silver bromide at 77 K
James Riesenfeld. 213
Reduction of the electron potential at the surface by sensitizing dyes adsorbed on cadmium sulfide
J. W. Trusty, J. M. Ferrier, G. B. Freeman, and **R. C. Nelson.** 510
Regeneration of ferricyanide bleach with sodium bromite
David K. Bulloch. 524
Rejuvenation of spent photographic fix by selective resins
Richard A. Wallace. 282
Relaxation measurements on Frenkel defects in AgCl and CuCl single crystals
W. Rind and **W. Martienssen.** 58
Reports from the International Colloquium on the Physics and Chemistry of the Silver Halide Crystal
Heinz F. Nitka. 57
Response functions for color densitometry
George H. Dawson and **William Voglesong.** 461
Role of latent-image bleaching in development inhibition
R. G. Willis and **D. E. Turk.** 142
Routine analysis of silver in photographic products
D. W. LaPalme, G. H. Klinger, and **J. J. Hawley.** 400
Semiconductor sensitization of photosensitive materials. II. Spectral sensitization of silver halides with PbO—A photographic diode
B. Levy and **M. Lindsey.** 135
—Part III. Photographic transistors—AgX–Dye–PbO Systems
Boris Levy and **Marcia Lindsey.** 423
Silver halide crystals and the conception of space charge
J. V. Ardashev and **D. M. Samoylovitch.** 348
Silver halide crystals as particle track detectors
G. Haase, F. Zorgiebel, E. Schopper, F. Granzer, J. U. Schott, and **F. Wendnagel.** 409
Spectral sensitization of bisazide compounds
Takahiro Tsunoda, Tsuguo Yamoka, and **Gentaro Nagamatsu.** 390
Spectral sensitization of pure and doped silver bromide
R. Steiger, P. Junod, B. Kilchoer, and **E. Schumacher.** 107
Study by luminescence techniques of traps in silver halides
E. Fatuzzo and **R. Oggioni.** 319
Study of the mechanism of supersensitization of 1,1′-diethylcyanine
J. E. Jones and **P. B. Gilman, Jr.** 367
Study of the spectrally sensitized low-intensity desensitization effect on silver bromide
S. S. Collier and **P. B. Gilman, Jr.** 102
Spectral sensitization of evaporated silver bromide by monomolecular layers of cyanine dyes
D. F. O'Brien. 226
Spectral sensitization of mobile positive holes
R. W. Berriman and **P. B. Gilman, Jr.** 235
Superadditivity of negatively charged developing agents forming semiquinones. X. Superadditivity effects with hydroxylamines
J. F. Willems. 255
The chemistry of fixing. I. Silver complexation by thisulfate anion
M. R. V. Sahyun. 171
—II. Silver complexation by thiocyanide anion
M. R. V. Sahyun. 174

AUTHOR INDEX

Akira, Kumai. *See* **Inaba, Yutaka**

Altman, Jr., J. H., Grum, F., and **Nelson, C. N.**
Photographic speeds based on radiant energy units. 513

Ames, Allan E.
How many quanta, revisited. 154

Positive holes: 197, 235
Positron annihilation: 201
Printout: 382
Processing: 524

Quantum efficiency: 154, 205

Radiography: 503
Reciprocity failure: 373, 451
Recombination: 58
Redox potential: 142
Refractive index: 165
Relief images: 386, 446

Resins: 33, 282
Resolution: 446
Reversal effects: 102, 235

Scattering: 394
Semiconductors: 423
Sensitizing: 306, 373, 423
Sensitometry: 513
Sharpness: 503
Signal-to-noise ratio: 261
Silver bromide: 135, 213, 226, 299
Silver bromide spectra: 334
Silver chloride: 115, 135
Silver complexes: 142, 171, 174
Silver halide: 11, 201, 205, 272
Silver halide crystals: 64
Silver halide grains: 58, 69, 86, 94, 188, 197, 235, 289, 295, 306, 319, 326, 348, 351
Silver images: 272
Silver iodide: 299, 405, 499
Silver recovery: 282
Slow phenomenon: 38
Spaceborne photography: 177
Spatial filtering: 50
Spectral absorption: 177
Spectral sensitization: 11, 102
Spectral sensitizing: 107, 115, 135, 226, 235, 367, 423, 446
Speed: 513
Superadditivity: 255
Supersensitizing: 367
Surface latent image: 235, 306, 434, 442
Surface structure: 188

Temperature effects: 58
Thermoplastic recording: 473
Thin films: 205
Thiocyanates: 174
Thiosulfates: 171

Xerographic recording: 47
Xerography: 47, 473
